Columbia, South Carolina 29210

RE: Dominion Energy South Carolina, Inc.
Notices of New Natural Gas Construction Projects

Dear Ms. Boyd:

Dominion Energy South Carolina, Inc. ("DESC" or "Company") is required to notify the Public Service Commission of South Carolina ("Commission") and the South Carolina Office of Regulatory Staff ("ORS") of natural gas construction projects with costs of \$500,000 or more. See S.C. Code Ann. Reg. 103-412.2.7(A). In compliance with the regulation, this letter serves as notification to the Commission that DESC plans hereby notifies the Commission of the following four projects for which the total cost of construction is anticipated to exceed \$500,000:

1. DESC plans to install approximately 8,800 feet of 6-inch high pressure steel natural gas pipeline to serve Prestage Farms in Kershaw County. The new 6-inch gas main will be installed adjacent to SC-34 and Dr. Humphries Road, starting at a new regulating station on SC-34 and heading east along SC-34 to Dr. Humphries Road. The pipeline will continue south along Dr. Humphries Drive to new Prestage Farms site. DESC anticipates that construction will begin January 2022.
2. DESC plans to install approximately 1,500 feet of 16-inch steel natural gas pipeline located along Azalea Drive in North Charleston, South Carolina. The pipeline replacement will be installed within existing DESC right-of-way using horizontal directional drilling and open trench installation methods. The project will replace infrastructure to maintain DESC's ongoing commitment to provide safe, reliable, and affordable natural gas service in the southern South Carolina region. DESC anticipates that construction will begin in the first quarter 2022.

3. DESC also plans to install approximately 1,500 feet of 12-inch steel natural gas pipeline located along Azalea Drive in North Charleston, South Carolina. The pipeline replacement will be installed within existing DESC right-of-way using horizontal directional drilling and open trench installation methods. The project will replace infrastructure to maintain DESC's ongoing commitment to provide safe, reliable, and affordable natural gas service in the southern South Carolina region. DESC anticipates that construction will begin in the first quarter 2022.
4. DESC plans to install approximately 38,500 feet of 16-inch steel natural gas pipeline starting at the existing River Neck Road Station and extending south paralleling Old River Road to its terminus at the existing Old River Road at Bluff Road Regulating Station / Pamplico Tap MLV in Florence County. The project will provide the additional capacity and flexibility DESC's system requires to meet both current and anticipated customer growth in the eastern South Carolina region. DESC anticipates that construction will begin in the second quarter 2022.

By copy of this letter, we are also notifying the South Carolina Office of Regulatory Staff of the Company's planned construction projects.

If you have any questions, please do not hesitate to contact me.

Very truly yours,

Matthew W. Gissendanner
